

Training on Good Practices - Use of Materials & HSW Tools – Electric Networks

1. Main Objectives:

At the end of the course students should be able to:

- Identify the consequences of accidents of electrical origin in human and material terms.
- Diagnose and identify the most common causes of electrical accidents and accidents in height.
- Identify the risk of accidents with the in a perspective of prevention.
- Comply with the procedures associated with the use of equipment for individual and collective protection.
- Comply with the procedures associated with the maintenance and preservation of equipment for individual and collective protection.

2. Topics:

- Study the accident.
- Protective equipment for individual use.
- Protective equipment for collective use.
- Work at height.
- Bad and good practices in the use of equipment.
- Isolated tools - Optimizing your perfect use.
- Latest products and new technologies in this area.

3. Methodology

- Active, participatory methodology and exhibition with practical demonstrations of equipment's best way of use.
- This course can be modified according to customer needs and other themes can be included and developed if necessary.
