

## ● HIGH VOLTAGE DETECTORS

### ● ELECTRONIC ABSENCE OF VOLTAGE DETECTOR - TAG 2000

#### Characteristics

- Voltage Detector, CEI 61243-1 standard
- Voltage usage: 3kv to 90kv 50Hz
- Indicator of voltage presence with three red LEDs and buzzer
- Indication of absence of voltage with green LED
- Powered by 9-volt alkaline batteries
- Supplied with box and 32715V adapter for APV rod

Detector type	Voltage (kv)	Reference
Voltage (HTA)	3 to 90	TAG 2000

### ● ABSENCE OF VOLTAGE ELECTRONIC DETECTOR (HTB) - TAG 300

#### Characteristics

- Voltage Detector, NFC 18311 standard
- Voltage usage: up to 400kv
- Indicator of voltage presence with three red LEDs and buzzer
- Indication of absence of voltage and proper functioning with green LED
- Powered by a 9-volt alkaline battery
- Supplied with metal box

Detector type	Voltage (kv)	Reference
Voltage (HTB)	Up to 400	TAG 300
